

# KCJIS Infrastructure Updates

Joe Mandala, KBI CIO

# Security Architecture Modernization

- ✔ Phase 2/3.1 – IAM Selection and Deployment, Single Sign-On (SSO) Discovery and Planning (underway, partially complete)
  - ✔ KACIS Replacement **go-live planned Q2 2017**
  - ✔ SSO Platform in place (Portal, eStatute, RapBack)
- Phase 4/3.2 – RSA alternatives Discovery, SSO Integration/Federation outward (beginning)
  - Federation platform discovery has begun
  - RSA alternatives discovery will follow
  - SSO Integration will continue

# SSAP Sunset

- SSAP = State Switch Access Protocol
  - Old, legacy protocol, established in 2000
  - Based on outdated technology
  - Inflexible and Difficult to work with for new partners
- KSIP = Kansas Switch Interface Protocol
  - Newer protocol, established in 2011
  - Based on newer technology
  - Easier to build to and work with

# SSAP Sunset

## SSAP IS GOING OUT OF SERVICE JULY 1, 2018

- This will affect agencies who have RMS or CAD vendors with a direct connection to the state switch
- KBI Help Desk has been reaching out to affected agencies
- If you have questions, contact the KBI Help Desk

# KCJIS User Groups

- User Groups have been relatively inactive for years, with the exception of one
- These groups are critical for many reasons, some of which include:
  - Feedback and Guidance to state agencies
  - Exchange of operational information between local agencies
  - Provide testing and acceptance for changes and new services
  - Strength of shared experience and community
  - Sharing family recipes

# KCJIS User Groups

- There are many different disciplines, job descriptions, and types of people engaged in the use of KCJIS – so these groups should truly represent a broad spectrum of KCJIS users
- If interested in participating, or know someone who is, please contact:

**Melissa Weisgerber**

(785) 296-8281

# Enterprise Service Bus (ESB)

- Replacement of the KBI ESB is occurring this year
- We will be able to offer integrations between RMS/CAD systems, regional systems, and state systems
- If your agency has particular pain points with having to send the same information to multiple places – particularly multiple state agencies – this is a potential place that we can help
- If you think it's something you'd like to explore, please ask

# Questions?
